

LUKE ESWORTHY

full-stack web
developer

As a current student at Nashville Software School and a perpetual student of life, I greatly value any chance to learn and grow. Whether doing something new or for the hundredth time, there is always an opportunity to get something new from every experience.

After graduating with my B.S. in Business Administration from The University of Tennessee at Knoxville, I continued working in the automotive industry, where my passion is. In that time, I have been able to try my hand at many facets of the industry: photographing inventory and managing online sales site & advertisements, selling, managing a lot of vehicles for sale, completing regular maintenance & repairs, and custom performance enhancements. I have enjoyed the challenges I faced, the knowledge I gained and the relationships I made.

My decision to make the move into being a full-time student and a complete shift in industries came not from boredom but from a change in where I see my life going, and this is my first step in that direction.
